REGISTRATION REPORT.

To His Excellency the Governor and the Honorable Council :

The sixth annual report relating to the registration and return of births, marriages, divorces, and deaths, for the year ending December 31, 1885, is herewith presented. The same order of arrangement, in respect to tables, has been maintained as in previous reports. Some additional information relative to certain diseases has been added. It is believed that the facts given in relation to marriages are as nearly correct as can be attained under any law. A comparison of the tables on this subject with those published in other States leads to the belief that approximate accuracy has been secured.

The registration of births is not so accurate, for the reason that a large number probably remain unreported, and of those reported a large number lack the name of the child. Some additional legislation is necessary to perfect the registration of births. The report made within six days after the birth seldom contains the name of the child. From a historical or genealogical standpoint, and in legal questions where the identity of the person is concerned, the record of the name of the child, as well as of its parents, date of birth, etc., are essential. On the other hand, unless the physician's return is made within a few days after the event, it is liable to be overlooked or forgotten; consequently no return would be made by him.

Again, there are a large number of births unattended by any physician, which are not reported to the local registrar. To obviate the defects which exist from these causes it is necessary to make some change in the law. There are two ways suggested: First. That a return of every birth which occurs during the calendar year preceding the annual return of the inventory blanks should be entered upon such blanks by the parents, with all the facts which the law calls for. Such an entry could be as easily made as any other fact called for by the inventory blank. As these inventory blanks are not returnable until April, every child would be at least three months old, and nearly all of them would have been named. The assessors or selectmen should then place these returns in the hands of the local registrar for recording, and the return to the state registrar would then be made in May instead of in January. This method might be supplemented by giving the local registrar a reasonable fee for discovering and reporting any births not returned, and for

securing and recording the names of those children who were not named when the inventory blank was returned.

Second. The local registrar might be made responsible for the thorough enforcement of the registration law within his jurisdiction, and be required to collect all facts called for by the law, and not otherwise reported to him. This method, however, would probably be attended with greater expense than the other, and would not be as effectual in the aggregate, as its enforcement would depend in a great measure upon the interest manifested by the local registrar and the compensation allowed.

The registration of marriages is as complete as can be secured under any system; in fact, it may be said to be correct, very few marriages remaining unreported.

Under the present system of requiring burial permits, the record of deaths has been brought to a degree of perfection that makes the record, so far as numbers are concerned, very nearly correct. This opinion is based upon the death rate. The difficulty with which it was thought the operation of this law would be attended has been found by experience to have but little foundation, and the accuracy of registration has been greatly improved thereby. In some instances there has been a little misunderstanding as to how and where a permit should be obtained, and under what circumstances it should be considered valid. For the information of those who do not clearly understand its provisions, the following brief statement is made:

1. A permit should be obtained in the town where the person died. The registrar of another town has no right to grant a permit.

2. A permit having been obtained according to law, it should be received by the authorities of any other town without question, and a second permit, except in case of disinterment, should not be required.

3. The return by the undertaker or sexton should always be made to the registrar of the town or city where the death occurred, without regard to the place of burial. Permits properly issued by authorities of other States should be recognized as valid in this State.

Local registrars should consider themselves responsible for the enforcement of the law within their respective towns and cities. They should inform the undertakers of the provisions of the law (copies of which will be furnished by the state registrar), and in all instances should require that permits be obtained before burial. Local registrars are also requested to notify the state registrar of any violations of the law that may come to their knowledge. Local registrars should at all times be provided with blanks for their own, sub-registrars', and physicians' use, which may be obtained from the state registrar upon application.

The attention of physicians is called to the nosological table which this report contains:

BIRTHS, MARRIAGES, AND DEATHS.

5

TABLE 1.

Showing Births, Marriages, and Deaths for 1880, 1881, 1882, 1883, 1884, and 1885, with Annual Increase in number reported.

COUNTIES.	Population of 1880.	BIRTHS.					MARRIAGES.					DEATHS.

Yearly increase since 1880 in numbers reported.....	366	1,099	26	97	72	201	603	62	-203	-112	821	351	420	773	7
Total increase in numbers reported since 1880.....	1,875	1,901	1,998	2,070	804	866	663	551	1,172	1,592	2,365	2,372

Table 1 shows the number of births, marriages, and deaths for a period of six years, with the variations in the number annually reported. An examination of this table shows that there has been a constant improvement in the registration since the first report was made in 1880. During the period mentioned there has been a gain of 2,070 births, 551 marriages, and 2,372 deaths. In 1884 and 1885 there was a falling off in the number of marriages reported. In 1884 there were 203 less marriages reported than in 1883, and in 1885 112 less than in the preceding year. This decrease in marriages is believed to be actual, and not a defect in registration. The cause for this decrease may, perhaps, be better explained by those who are studying the subject of social science.

TABLE 2.

Population of 1880 ; Births, Marriages, and Deaths, with percentage of each to one thousand of the population, for the year ending December 31, 1885, by Counties.

COUNTIES.	of Population 1880.	Births.	Rate per 1,000 of population.	Marriages.	Rate per 1,000 of population.	Deaths.	Rate per 1,000 of population.
Rockingham.....	49,044	640	13.04	447	9.11	911	18.50
Stratford.....	35,558	621	17.46	388	10.91	619	17.40
Belknap.....	17,948	256	14.26	150	8.35	289	16.10
Carroll.....	18,224	245	13.44	182	9.98	269	14.77
Merrimack.....	46,300	734	15.85	361	7.79	796	17.19
Hillsborough.....	75,634	1,952	25.80	815	10.77	1,701	22.48
Cheshire.....	28,734	511	17.73	233	8.10	494	17.19
Sullivan.....	18,161	267	14.70	109	6.00	284	15.63
Grafton.....	38,788	631	16.26	327	8.43	611	15.75
Cos.....	18,580	462	24.86	168	9.09	227	12.21
Total.....	346,991	6,319	18.21	3,180	9.16	6,201	17.87

It will be seen by this table that the

Birth rate for the State is 18.21 per 1,000 of the population.

Marriage rate " 9.16 " "

Death rate " 17.87 " "

The birth rate is too low, showing that the registration is incomplete. An examination of corresponding reports for Massachusetts shows a birth rate of 25.12 to 1,000 of the population.

Rhode Island . 24.00 " "

Connecticut . 23.05 " "

The highest rate in this State is returned from those counties which contain a relatively large number of the laboring classes. Hillsborough county, with its great number of factory operatives, reports 25.8 per 1,000; Coös county, which has a large number of laborers engaged in the lumbering business, ranks next, 24.86 per 1,000; and Cheshire and Strafford counties next in order, with 17.78 and 17.46 respectively.

The marriage rate is highest in Hillsborough county, followed by Strafford, Rockingham, Carroll, and Coös in order. The marriage rates for Massachusetts, Rhode Island, and Connecticut are 8.78, 8.40, and 7.89 respectively. It will be seen that our marriage rate, 9.16, is greater than in the States named.

The death-rate column shows that the greatest defect in registration exists in Coös county, where it is given as 12.21 per 1,000. It is believed that the death rate for the State, if correctly reported, would be between 18 and 19 per 1,000. The rather high rate of mortality in Hillsborough county is due largely to the fatality among the lower classes in the manufacturing cities.

BIRTHS.

There were reported for the year 6,319 births, 3,188 males and 3,053 females. The excess of male children is in about the same proportion as exists in other States. In 78 cases the sex is not stated. Under the head of parentage we find that 3,413 have parents both American; 1,506, parents both foreign; 350, American mother and foreign father; 334, American father and foreign mother; and 716, parentage not stated.

These figures present some interesting facts in connection with the subject of nativity of parents. The last census gave for this State a native population of 300,697; foreign-born, 46,294, — or, in other words, the foreign population was 10.45 per cent of the total population of the State, while the births from foreign parentage were 44 per cent of the American and 23.83 per cent of the total number of births for the year. It is probable that this rate should be increased by the greater part of those classed under “not stated” in the classification of parentage, as they undoubtedly belong largely to the foreign-born population. The columns of mixed parentage are very nearly balanced. Thus, it will be seen that while the foreign population is only about 10 per cent of the total, the births from foreign-born parents probably exceed 30 per cent of the total.

It is probable that the rate would be still further increased if there were a full registration of all births, as the deficiency is confined largely to the unreported among this class.

The same ratio in marriages does not by any means hold good. There were 2,218 marriages “both American,” 368 “both foreign,” and 282 “not stated.” The columns “husband American” and “wife American” nearly balance.

The “both foreign” marriages were 16.59 per cent of the “both American,” and 11.57 per cent of the total number of marriages. If the entire number classed under “not stated” were added to the column “both foreign,” it would then be only 29.30 per cent of the marriages classed under “both American,” and 20.44 per cent of the total number.

Of the 6,201 deaths 4,847 were native-born, 578 foreign-born, and 758 not stated. Those known to be foreign-born were 11.92 per cent of those known to be American-born. If the “not stated” are added to the “foreign-born,” where doubtless many of them belong, they would then be 21.54 per cent of the total number of deaths.

TABLE 4.

BIRTHS BY COUNTIES, SHOWING PROPORTION OF MALES TO FEMALES, 1885.

Coss.....	47.18	30.30	15.15	34
Total for State	54.01	23.83	10.82	716

This table shows the percentage of births more fully than was given above. It is interesting to note the percentages in different counties. It will be seen that in Hillsborough county the births of foreign-born parents exceed the native-born. Of course the foreign population is greatest in those counties having manufactories. This is illustrated by Hillsborough and Carroll counties, the latter having but few manufactories.

A BRIEF SUMMARY OF THE RECORD OF DEATHS.

CONSUMPTION,

as in previous years, caused more deaths than any other single disease, 857 being reported from this cause alone; of these 373 were males, 480 females, and 4 sex not stated. The record by month is as follows: January, 71; February, 82; March, 87; April, 79; May, 83; June, 96; July, 64; August, 54; September, 54; October, 65; November, 65; December, 55; month not stated, 2. 31 were under one year of age, 14 between one and five, 4 between five and ten, 11 between ten and fifteen, 87 between fifteen and twenty, 219 between twenty and thirty, 161 between thirty and forty, 109 between forty and fifty, 75 between fifty and sixty, 75 between sixty and seventy, 43 between seventy and eighty, 19 over eighty, and 9 age not stated. The mortality from consumption was 13.81 per cent of the total mortality for the State. In 1883 it was 14.01 per cent. The percentage of consumption to the total mortality in the cities was as follows:

Manchester	18.03
Concord	10.68
Nashua	14.86
Dover	16.17
Portsmouth	12.18
Keene	22.80

[illegible]

* Twenty-nine were widows.

PNEUMONIA

ranks third on the list, there being 504 deaths recorded under this head against 436 in 1884, 244 males, 259 females, and 1 sex not stated; 69 were under one year of age, 49 between one and five, 8 between five and ten, 4 between ten and fifteen, 11 between fifteen and twenty, 15 between twenty and thirty, 27 between thirty and forty, 32 between forty and fifty, 37 between fifty and sixty, 72 between sixty and seventy, 105 between seventy and eighty, 74 over eighty, and 1 age not stated; 53 died in January, 59 in February, 101 in March, 95 in April, 35 in May, 25 in June, 13 in July, 10 in August, 10 in September, 33 in October, 38 in November, and 32 in December.

APOPLEXY AND PARALYSIS.

There were 491 deaths from these two causes, 234 males, 256 females, and 1 with sex not stated, which was classed with the males; 2 of the decedents were under one year of age, 2 between one and five, 2 between five and ten, 2 between ten and fifteen, 10 between twenty and thirty, 15 between thirty and forty, 33 between forty and fifty, 52 between fifty and sixty, 92 between sixty and seventy, 180 between seventy and eighty, 97 over eighty, and 4 age not stated; 43 died in January, 49 in February, 39 in March, 51 in April, 31 in May, 45 in June, 39 in July, 38 in August, 36 in September, 50 in October, 41 in November, 29 in December.

HEART DISEASE.

There were 474 deaths from heart disease, 241 males and 233 females; 12 were under one year of age, 5 between one and five, 1 between five and ten, 5 between ten and fifteen, 5 between fifteen and twenty, 17 between twenty and thirty, 19 between thirty and forty, 41 between forty and fifty, 56 between fifty and sixty, 122 between sixty and seventy, 125 between seventy and eighty, 61 over eighty, and 5 age not stated; 32 died in January, 37 in February, 46 in March, 47 in April, 37 in May, 38 in June, 42 in July, 35 in August, 43 in September, 39 in October, 44 in November, 34 in December.

OLD AGE.

There are 420 deaths registered under this disease, 179 males, 240 females, and 1 with sex not stated; of these 1 was between fifty and sixty years of age, 7 between sixty and seventy, 89 between seventy and eighty, 321 over eighty, and 2 age not stated. The old-

CANCER.

There were 213 deaths from cancer, 74 males and 139 females. Cancer, 130; cancer of bowels, 6; cancer of brain, 1; cancer of breast, 5; cancer of face, 1; cancer of liver, 12; cancer of rectum, 3; cancer of stomach, 38; cancer of tongue, 1; cancer of uterus, 16. Of these, 24 died in January, 19 in February, 20 in March, 23 in April, 10 in May, 15 in June, 13 in July, 13 in August, 11 in September, 21 in October, 22 in November, 21 in December, and 1 not stated.

TYPHOID FEVER.

There were reported 141 deaths from this cause, 67 males and 74 females. This included 4 deaths from "fever," 5 from "bilious fever," 5 from "gastric fever," and 3 from "typhus fever," which would leave 124 from typhoid fever, as reported. Of the decedents, 2 were under one year of age, 7 between one and five, 8 between five and ten, 11 between ten and fifteen, 21 between fifteen and twenty, 35 between twenty and thirty, 14 between thirty and forty, 8 between forty and fifty, 8 between fifty and sixty, 10 between sixty and seventy, 12 between seventy and eighty, 3 over eighty, and 2 not stated; 8 died in January, 8 in February, 13 in March, 7 in April, 12 in May, 13 in June, 3 in July, 8 in August, 28 in September, 17 in October, 13 in November, 11 in December.

MENINGITIS.

135 deaths are recorded under this disease, 70 males, 64 females, and 1 sex not stated. Of these, 37 were under one year of age, 38 between one and five, 11 between five and ten, 5 between ten and fifteen, 8 between fifteen and twenty, 11 between twenty and thirty, 10 between thirty and forty, 2 between forty and fifty, 5 between fifty and sixty, 1 between sixty and seventy, 5 between seventy and eighty, 2 age not stated; 11 died in January, 15 in February, 10 in March, 14 in April, 9 in May, 15 in June, 8 in July, 15 in August, 7 in September, 11 in October, 11 in November, 9 in December.

BRIGHT'S DISEASE.

112 deaths from this disease, 70 males and 42 females; 2 were under one year of age, 2 between one and five, 5 between ten and fifteen, 3 between fifteen and twenty, 9 between twenty and thirty, 17 between thirty and forty, 12 between forty and fifty, 14 between fifty and sixty, 22 between sixty and seventy, 20 between seventy and eighty, 5 over eighty, and 1 age not stated; 7 died in January,

8 in February, 13 in March, 11 in April, 12 in May, 12 in June, 8 in July, 8 in August, 8 in September, 7 in October, 12 in November, 6 in December.

BRAIN DISEASE.

There were 109 deaths recorded under this head, 51 males and 58 females; 10 were under one year of age, 7 between one and five, 2 between five and ten, 1 between ten and fifteen, 1 between fifteen and twenty, 5 between twenty and thirty, 3 between thirty and forty, 1 between forty and fifty, 17 between fifty and sixty, 23 between sixty and seventy, 24 between seventy and eighty, 14 over eighty, and 1 age not stated; 9 died in January, 6 in February, 10 in March, 8 in April, 16 in May, 7 in June, 3 in July, 10 in August, 11 in September, 7 in October, 16 in November, 6 in December. "Softening of the brain" is included under this head.

BRONCHITIS.

Under this head there are 108 deaths, 41 males and 67 females; 28 under one year of age, 12 between one and five, 2 between five and ten, 1 between ten and fifteen, 2 between twenty and thirty, 4 between thirty and forty, 1 between forty and fifty, 3 between fifty and sixty, 10 between sixty and seventy, 19 between seventy and eighty, 25 over eighty, and 1 age not stated; 14 died in January, 12 in February, 14 in March, 13 in April, 15 in May, 10 in June, 2 in July, 2 in August, 7 in September, 10 in October, 4 in November, 5 in December.

DEBILITY.

There were 107 deaths from this cause, 55 males and 52 females; 48 were under one year of age, 3 between one and five, 4 between thirty and forty, 4 between forty and fifty, 1 between fifty and sixty, 12 between sixty and seventy, 18 between seventy and eighty, 17 over eighty. Of these, 5 died in January, 10 in February, 10 in March, 13 in April, 11 in May, 9 in June, 12 in July, 11 in August, 9 in September, 4 in October, 8 in November, 5 in December.

DIARRHŒA AND DYSENTERY.

One hundred deaths occurred from these diseases, 46 males and 54 females; 24 were under one year of age, 16 between one and five, 3 between five and ten, 2 between twenty and thirty, 3 between thirty and forty, 6 between forty and fifty, 5 between fifty and sixty, 14 between sixty and seventy, 14 between seventy and eighty, 12 over eighty, and 1 not stated; 5 died in January, 2 in February, 3 in

April, 3 in May, 9 in June, 16 in July, 26 in August, 20 in September, 9 in October, 3 in November, and 4 in December. The deaths from "cholera morbus" are included under this head.

DROPSY.

There were 91 deaths from dropsy, 39 males and 52 females; 2 were between one and five years of age, 2 between ten and fifteen, 2 between twenty and thirty, 3 between thirty and forty, 6 between forty and fifty, 12 between fifty and sixty, 20 between sixty and seventy, 26 between seventy and eighty, 13 over eighty, and 5 not stated: 9 died in January, 5 in February, 15 in March, 4 in April, 6 in May, 12 in June, 4 in July, 8 in August, 1 in September, 11 in October, 8 in November, 7 in December, and 1 not stated.

DIPHTHERIA.

Seventy-eight deaths are recorded under this head, 37 males and 41 females; 10 were under one year of age, 32 between one and five, 22 between five and ten, 5 between ten and fifteen, 3 between fifteen and twenty, 4 between twenty and thirty, 1 between forty and fifty, 1 between fifty and sixty; 13 died in January, 5 in February, 3 in March, 2 in April, 5 in May, 2 in June, 3 in July, 6 in August, 6 in September, 9 in October, 12 in November, 12 in December.

The summary of diseases might be carried still further, but it is thought to be unnecessary. Special tables on other diseases can be constructed from the tables given in the main part of the report, excepting possibly data in reference to occupations, by any one who desires to study a given subject more in detail than is given in any single table. It is believed, however, that the present arrangement will show all the facts desired, although several tables may have to be consulted for that purpose. It is to be regretted that the reports of the several towns and cities are too incomplete upon the subject of occupation from which to compile tables that would be reliable in connection with general causes of death.

Respectfully submitted.

IRVING A. WATSON,

Registrar of Vital Statistics.

APPENDIX.

NAMES OF CAUSES OF DEATH.*

It should be stated that the nomenclature of diseases in the nosological arrangement on the following pages is not intended to include the names of the whole list of morbid phenomena affecting the human organism, but the names of such only as are directly the cause of death, or such as ordinarily predispose to or set in motion the morbid processes that end in death.

In the construction of the classification now adopted, use has been made of the results and conclusions of a committee of the Royal College of Physicians, of England (who have been engaged for several years in a revision of the British nomenclature of diseases), as far as such conclusions have been ascertained from brief reports in different medical journals, and from such other sources as were accessible (the complete report not having yet been issued), and from examination of the classifications in use in different countries in Europe and America.

It should be said that all these classifications have been and are essentially alike, that all have been based designedly on observed facts and most advanced conclusions in relation to pathological processes and morbid conditions, inductive, causative, progressive, and ultimate.

The statistical nosology will consist of two lists of causes of death.

A TABULAR LIST AND SUPPLEMENTAL LIST.

The tabular list comprises the chief or primary causes of death which will be used in Table 13, in the preparation of the Registrar's annual reports, and will, therefore, include all those named in the supplemental list, when the final arrangement is completed.

The supplemental list is subordinate to the tabular list, and contains synonyms, or names of related diseases, which may be actually, or are supposed to be, causes of death, and which are in addition to those in the tabular list, and which are often found in physicians' certificates of death. These will all have a place, in alphabetical order, in Table 18, and will be variously grouped under different heads in Table 13, as the figure which precedes each cause in the supplemental list will correspond with the figure of the head in the tabular list under which that cause is placed.

* Taken largely from the list prepared by the State Registrar of Rhode Island.

NOMENCLATURE OF CAUSES OF DEATH.

CLASSES.

- I. General Diseases. — A. Specific and febrile. (Zymotic.)
- II. General Diseases. — B. Cachectic. (Constitutional.)
- III. Special Diseases. — A. Functional or organic. (Local.)
- IV. Special Diseases. — B. Developmental. (Developmental.)
- V. Violent Deaths. — From injuries. (Violence.)

SUB-GROUPS OR ORDERS.

CLASS I. — ZYMOTIC DISEASES.

Order one, Miasmatic. Order two, Enthetic. Order three, Dietic.
Order four, Parasitic.

CLASS II. — CONSTITUTIONAL DISEASES.

Order one, Diathetic. Order two, Tubercular.

CLASS III. — LOCAL DISEASES.

Order one, Diseases of the Nervous System. Order two, Organs of Circulation. Order three, Organs of Respiration. Order four, Organs of Digestion. Order five, Urinary Organs. Order six, Reproductive Organs. Order seven, Osseous and Locomotory Organs. Order eight, Integumentary System.

CLASS IV. — DEVELOPMENTAL DISEASES.

Order one, Of Children. Order two, Of Women. Order three, Of Old Age. Order four, Of Nutrition.

CLASS V. — VIOLENT DEATHS.

Order one, Accidents and Negligence. Order two, Homicide. Order three, Suicide.

CLASS I.—ZYMOTIC DISEASES.

TABULAR LIST.

For Table 13 of the Registration Report.

ORDER ONE.—MIASMATIC.

- I. One.—
1. Carbuncle.
 2. Cholera, Asiatic.
 3. Cholera, sporadic.
 4. Cholera infantum.
 5. Cholera morbus.
 6. Croup (pseudo membranous).
 7. Diphtheria.
 8. Diarrhoea.
 9. Dysentery.
 10. Erysipelas.
 11. Fever, bilious.
 12. Fever, cerebro-spinal.
 13. Fever, intermittent.
 14. Fever, malarial.
 15. Fever, typhoid.
 16. Fever, typho-malarial.
 17. Fever, unspecified.
 18. Fever, yellow.
 19. Influenza (epidemic).
 20. Measles.
 21. Mumps.
 22. Metria (puerperal fever).
 23. Pertussis.
 24. Tonsillitis.
 25. Scarlatina.
 26. Small-pox.
 27. Varicella.

ORDER TWO.—ENTHETIC.

- I. Two.—
1. Glanders.
 2. Gonorrhoea.
 3. Hydrophobia.
 4. Malignant pustule.
 5. Septicæmia.
 6. Syphilis.

SUPPLEMENTAL LIST.

Synonyms or Related Diseases.

ORDER ONE.—MIASMATIC.

- I. One.—
1. Anthrax.
 - Gangrenous boil.
 4. Enterocolitis, } Infantile.
 - Gastro-enteritis, }
 10. Hospital gangrene.
 - Pyæmia.
 - Phagadæna.
 - Phlegmon.
 15. Infantile fever.
 - Typhus fever.
 20. Rotheln.
 21. Parotitis.
 22. Child-bed fever.
 23. Whooping cough.
 24. Quinsy.
 25. Scarlet fever.
 - Angina maligna.
 26. Varioloid.
 27. Chicken-pox.
 - Miliaria.

ORDER TWO.—ENTHETIC.

- I. Two.—
1. Stricture of the urethra.
 - Gonorrhœal ophthalmia.
 5. Necusis.

CLASS I. — ZYMOTIC DISEASES — *Continued.*

TABULAR LIST.	SUPPLEMENTAL LIST.

SUGGESTIONS CONCERNING PHYSICIANS' CERTIFICATES OF DEATH.

It should be the endeavor to specify the causes of death as definitely and correctly as possible. It is not unusual to find a return of death with the physician's certificate naming the cause of death "Paralysis," "Paraplegia," "Fits," "Convulsions," "Dropsy," etc., which are merely secondary or consecutive causes, simply symptoms only, or results of some organic lesion or pathological derangement. Sometimes the alleged cause is really the final cause, as in a case of termination of life by paralysis, but the cause given as paralysis is not the determining cause. Apoplexy, or some lesion of the nervous centers, must be the original and determining cause of paralysis, paraplegia, hemiplegia, etc., and the determining cause should be stated as the primary in the return or certificate.

Convulsions are the symptoms or results of some antecedent or concurrent disease. They follow meningitis and other structural lesions of the nervous centers; they also occur from reflex derangement or disturbance of the nervous centers, as, in children, from intestinal irritation, or from inflammation, as in gastritis, enteritis, nephritis, etc. In such cases they may be contributory to death, and perhaps, in rare instances, a final cause, by inducing or taking

the form of tonic or tetanic spasm. But as contributory, or as a final cause, they are simply concomitant, and are not unfrequently manifestations of the desperate efforts of expiring vitality to regain original and normal control. They should find place as secondary causes only in certificates of death.

"Fits" is too unmeaning a term to be used in any case. The word in a medical sense literally means an attack, an occurrence, or succession of attacks of some physical or mental disturbance, as "fits of sickness," "fits of melancholy," etc., and is not properly used as synonymous with convulsions from any cause. It would be just as sensible to attribute a death to an "occurrence" or an "attack" as a cause, as to "fits," without other qualification.

"Dropsy" and "ascites" have been allowed to stand as determining causes of death because of extended use, and because of the obscurity with which their causes in rare instances are involved. We can scarcely conceive of a dropsical accumulation without antecedent organic or functional disorder, derangement of the absorbent or secretory system, or depravation of the blood. They are left in the tabular list with not a little reluctance. Paralysis is also left in the tabular list for a like reason, and with the same doubt of propriety.

"Inflammation" does not in any way define the cause of death. The organ or organs affected should be mentioned, or else the death must remain unclassified.

"Hemorrhage" is sometimes returned as a cause, but unless accompanied by a further statement no inference can be drawn as to the real cause of death. The suicide who cuts his throat frequently dies of hemorrhage; sometimes the patient with typhoid fever succumbs from the same cause, yet to report "hemorrhage" as the cause of death would leave the actual cause in obscurity.

It may be suggested that it is sometimes difficult, and occasionally impossible, to ascertain positively the chief or leading cause of death. The physician last in attendance may find several functional or structural diseases, the morbid conditions multiple and complex, and not only the initial derangement, but the succession of morbid processes—proximate, consecutive, and ultimate—inextricably entangled and lost to discovery.

The careful diagnostician will, however, even then be able to conceive the probable leading cause, but, whether or not, he will be able at least to ascertain the most prominent and controlling lesion or functional derangement then existing, and which may reasonably be accepted as the primary cause of death.

The preceding remark applies very properly to cases of adventitious diseases which prove fatal, when occurring in individuals already suffering from some chronic disease of slower progress, as when fatal dysentery attacks a consumptive person, or one having chronic nephritis dies from pneumonia. The acute disease occurring independently of the chronic disease is the chief cause of death, although the fatal event may have been made more sure by the existence of the antecedent disease, and although the antecedent disease would have ultimately caused death.

In attributing death to scrofula, tuberculosis, tumor, cancer, abscess, and other generic terms as causes, the organic structure or locality where the disease is developed should always be given, otherwise such terms are very indefinite, and discredit the acquirements of the certifying physician.

The objects desired in presenting the preceding nomenclature of causes of death, and the suggestions following, are to subserve the purpose of greater uniformity in the use of nosological terms, and to promote the accomplishment of entire definiteness, accuracy, and completeness in the physicians' certificates of causes of death.

THE NEW HAMPSHIRE REGISTRATION LAW.

AN ACT FOR THE BETTER REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Be it enacted by the Senate and House of Representatives in General Court convened :

SECTION 1. The secretary of the State Board of Health shall be the registrar of vital statistics for the State, and shall furnish to sextons, to clergymen, and others authorized to marry, to physicians, town-clerks, and clerks of the society of Friends, a copy of this act, and suitable blanks for recording births, marriages, and deaths, so printed with appropriate headings as readily to show the following facts and such others as may be deemed necessary to secure an accurate registration :

I. The record of a birth shall state its date and place of occurrence, full Christian and surname (if named), color and sex of child, whether living or still-born, and the full Christian and surnames, color, occupation, residence, and birthplace of parents.

II. The record of a marriage shall state its date and place of occurrence, the name, residence, and official character of the person by whom solemnized, the full Christian and surnames of the parties, the age, color, occupation, and residence of each, the condition (whether single or widowed), whether first, second, or other marriage; and the full Christian and surnames, residence, color, occupation, and birthplace of their parents.

III. The record of a death shall state its date, the full Christian and surname of the deceased, the sex, color, condition (whether single or married), age, occupation, place of birth, place of death, the full Christian and surnames and birthplaces of parents, and the disease or cause of death.

SECT. 2. The attending physician, accoucheur, midwife, or other person in charge, who shall attend, assist, or advise at the birth of any child, living or still-born, within the limits of any town or city

in this State, shall report to the clerk of such town, within six days thereafter, all the facts regarding such birth, as is required in section one of this act.

SECT. 3. Every person authorized to unite persons in marriage shall make a record of every marriage solemnized before him, in conformity with the requisitions prescribed for blank records of marriages in section one of this act, and shall within six days thereafter deliver or forward to the clerk of the town in which the marriage intention was recorded a copy of such record of marriage.

SECT. 4. Whenever any person shall die, or any still-born child shall be brought forth in this State, the physician attending at such bringing forth, or last sickness, shall fill out and deliver to the undertaker, town-clerk, or other person superintending the burial of said deceased person, a certificate, duly signed, setting forth, as far as may be, the facts required in the record of a death, according to section one of this act; and it shall be the duty of the undertaker, or other person having charge of the burial of said deceased person, to add to said certificate the date and place of burial, and having duly signed the same, to forward it to the clerk of the town or city, and obtain a permit for burial; and in case of any contagious or infectious disease, said certificate shall be made and forwarded immediately.

SECT. 5. In the case of any deceased person not having had the attendance of a physician in his or her last sickness, the town-clerk may issue and sign the certificate of death, upon presentation of such facts as may be obtained of relatives, persons in attendance upon said deceased person during said last sickness or present at the time of death, and the permit for burial shall be issued upon such information.

SECT. 6. No interment or disinterment of the dead body of any human being, or disposition thereof in any tomb, vault, or cemetery, shall be made without a permit as aforesaid, nor otherwise than in accordance with such permit. No undertaker or other person shall assist in, assent to, or allow any such interment or disinterment to be made, until such permit has been given as aforesaid; and it shall be the duty of every undertaker or other person having charge of any burial place as aforesaid, who shall receive such permit, to preserve and return the same to the clerk of the town within six days after the day of burial.

SECT. 7. The town-clerk may appoint suitable and proper persons, not exceeding two in number in any town, as sub-registrars, who shall be authorized to issue burial permits based upon a death certificate, as hereinbefore provided, in the same manner as is

required of the town-clerk; and the said record of death upon which the permit is issued shall be forwarded to the town-clerk within six days after receiving the same, and all permits by whomsoever issued shall be returned to the town-clerk, as required by section seven of this act. The appointment of sub-registrars shall be made with reference to locality, so as to best convenience the inhabitants of the town.

SECT. 8. The clerk of every town shall keep a chronological record of all births, marriages, and deaths reported to him, and shall annually, in the month of January, transmit a copy of the record of all births, marriages, and deaths occurring during the year ending December 31st next preceeding such said report, to the state registrar, together with the names, residences, and official stations of all such persons as have neglected to make returns to him in relation to the subject-matters of such records, which the law required them to make.

SECT. 9. The state registrar shall cause the returns made to him in pursuance of the preceding section to be arranged, alphabetic indexes of all the names contained therein to be made, and the whole bound in convenient volumes and carefully preserved in his office. He shall annually make and publish a general abstract and report of the returns of the preceding year in such a form as will render them of practical utility, not more than one thousand copies of which shall be printed, one copy of which shall be forwarded to every town, one copy to each senator and representative, one copy to each State and Territory in the Union, and the remainder to such departments, libraries, and persons as the state registrar shall direct.

SECT. 10. The town-clerk's record of any birth, marriage, or death, or a duly certified copy thereof, shall be *prima-facie* evidence of such birth, marriage, or death, in any judicial proceeding.

SECT. 11. If any person shall willfully neglect or refuse to perform any duty imposed upon him by the provisions of this act, he shall be fined not more than one hundred dollars for each offence, for the use of the town in which the offence occurred, and it shall be the duty of the state registrar to enforce this section as far as comes within his power.

SECT. 12. The fees of physicians for making returns of each birth and death, as herein provided, shall be the same as are now in force; and the clerk of each city and town shall be paid by such city or town for receiving, recording, and returning the facts required to be recorded by this act, the sum of fifteen cents for each birth, marriage, and death.

SECT. 13. This act shall take effect and be in force on and after the first day of January, 1884; and all acts and parts of acts inconsistent with this act are hereby repealed.

[Approved September 7, 1883.]

AN ACT PROVIDING FOR A REPORT OF THE NUMBER AND CAUSES
OF DIVORCES.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. That the clerks of the supreme court shall, at the close of each term in their respective counties at which divorces are granted, make return to the registrar of vital statistics of the number of divorces decreed at that term, the causes thereof, the sex of the libellant, and the day of the decree.

SECT. 2. That it shall be the duty of the registrar of vital statistics to consolidate said returns, and publish them with his report of births, marriages, and deaths.

SECT. 3. That chapter 12 of the Session Laws of 1881 be and hereby is repealed.

SECT. 4. That this act shall take effect upon its passage.

[Approved July 9, 1885.]

AN ACT FOR THE BETTER PRESERVATION AND PUBLICATION OF
LOCAL VITAL STATISTICS.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. It shall be the duty of the clerks of towns and cities to furnish a transcript of the record of births, marriages, and deaths for each year, seasonably, to the proper municipal officers, for publication in the annual reports. The period to be annually covered by such transcripts and publication shall be fixed by regulation prescribed by the registrar of vital statistics for the State. Every printed annual town or city report shall contain a full and exact copy of such transcript for the town or city to which it relates.

[Approved October 6, 1887.]
